

COBBER™ STAPLE GUN SERIES 2

Introducing the **COBBER™ Staple Gun Series 2**. Constructed of the lightest weight materials, including 5005 aluminium body, stainless steel drive shaft, Susta-glide moly filled dry lube casing, and for low maintenance the **COBBER™ Staple Gun** has monomer cast bushes.

The **COBBER™ Staple Gun Series 2** has been designed for excellent performance on sites up to 45° degrees gradient, to accommodate this the handle is fully adjustable and can rotate to 90° degrees.

COBBER™ Features

PSI TECHNOLOGY (POSITIVE STAPLE INSERTION)

The Patented PSI Technology is the much anticipated anti-jamming device developed by the **COBBER™** International Team.

This technology resolves the problems of multiple staples jamming in the gun, eliminating poor performance, and site problems experienced by other staple guns throughout the industry.

EASY GLIDE SYSTEM

The **COBBER™** patented Easy Glide system allows high performance with no field maintenance. Weighing under 5.5 kgs the **COBBER™** is the lightest, fastest and most reliable fastening system available.

COBBER STAPLES

COBBER™ international delivers the complete package with staples being manufactured & designed specifically for the **COBBER™** staple gun.

COBBER™ Benefits

LIGHT WEIGHT

The **COBBER™** weighs in under 5.5 kgs making it easy to hold, easy to manoeuvre, and supporting OH & S.

PERFORMANCE & ACCURACY

The **COBBER™** can deliver a staggering 3300 staples per hour with accuracy on varying gradients.

LESS DOWN TIME & INSTANT STAPLE REMOVAL

The **COBBER™** Staple Gun series 2, has a quick release opening carriage for easy site inspection

SAFE TO OPERATE

The **COBBER™** is so light and easy to operate, reducing stress and fatigue compared to other industry models.

Available in two sizes, the **COBBER™ 150** for 150 mm staples, and a **COBBER™ 200** for 200 mm staples. Both are made from HD nail wire at an average of 900 Mpa.
